RFC8366bis voucher

`draft-ietf-anima-rfc8366bis`

`was ADOPTED: January 2022`

Michael Richardson,

(+Kent Watsen, Qiufang Ma, Max Pritiken, Toerless Eckert)

IETF 123
ANIMA Working Group

RFC8366bis:

See

https://datatracker.ietf.org/meeting/122/materials/slides-122-anima-rfc8366bis-updates-and-extensions-2-00

for the "storey so far"

Extension Mechanism

The proposed "extensions" mechanism, inspired from RFC8520 (MUD), needs additional review.

It also would benefit from NETMOD/NETCONF blessing.

Note: PYANG SID tool still has bugs processing rfc8366bis,

which MCR is unable to reproduce in a sane test case.

Otherwise, document is unchanged, and is ready for WGLC.
